

THE OLD DOCTOR

Dr. G. W. Shores.

Permanently Installed to Consult with, Examine and Treat Personally All Patients Coming to Zion's Medical Institute.

It is not in writing for the press regarding a man whose name is before the public, to dwell with exaggerated emphasis upon those qualities which make him valuable or helpful to the community and the commonwealth. But in this instance we shall confine ourselves to the plain, bare statement of the facts within our knowledge, and in place of exaggerated emphasis or extravagance we shall propose to leave much praise, that might worthily be given, unsaid, and many tributes, justly deserved, unexpressed.

In referring to the work of a physician and specialist who has permanently established offices in Salt Lake City—Dr. G. W. Shores—it is not exaggeration to say that he represents superior training, experience and skill, and that his success and the success of his famous system of treatment that is universally curing Chronic, Deep-seated and heretofore incurable diseases, has been marked and notable, and that this success has been won by no tricks or evasions, no false promises or exaggerated pretenses, but that it has been plainly and legitimately the result of methods that deserve success.

ADDRESS ALL MAIL TO

DR. G. W. SHORES, 34 EAST SECOND SOUTH STREET, SALT LAKE CITY.

Dr. G. W. Shores personally superintends the Mail Treatment and gives the same careful attention as to those calling at the office. Write at once for information regarding your disease and expert advice FREE.

Unquestionable skill in his practice, unquestionable honesty and sincerity in his printed statements, promptness and absolute integrity in financial dealings, low and uniform rates to all patients—these have plainly formed the basis of the success of which Dr. G. W. Shores has a right to be justly proud.

The fact that during the past year he has treated over 5,000 patients and published nearly 1,000 statements from patients giving their personal experience and showing the successful results of his work affords some indication of the measure of success that comes from the employment of such methods as we have alluded to.

From this date, Dr. G. W. Shores, the old doctor and founder of Zion's Medical Institute, the originator of Dr. Shores' famous system of treatment, will give his personal attention to all patients under treatment at Zion's Medical Institute. Dr. G. W. Shores will personally consult, examine, treat and care for every patient until cured. This applies to those at a distance treating by mail as well as to those visiting the Institute in person.

POISON IN THE BLOOD. AFTER ALL OTHERS FAIL.

And Another Case in Point Showing the Absolute Mastery of Dr. Shores' New Treatment Over All Chronic and Deep-seated Diseases.

Mr. Hicks is one of Utah's oldest pioneers. He came into the territory with an ox team in 1850. In an interview with the writer Mr. Hicks says:

"In '81 while working on the Walker Opera House I fell from an elevation of about forty feet and broke my right foot which, because of the condition of my blood, resulted in a running sore. I have suffered terrible pain night and day for years. All my friends and acquaintances knew the condition I was in. The very best of doctors in Utah did all in their power for me from time to time during the past thirteen years, but they failed to cure me. Sometimes I was so bad I had to quit work entirely.

"When I was induced to go to Doctor Shores I was in such a state of mind and day that I was not myself at all and was unable to do anything.

"I have been under Doctor Shores' treatment and have been using his vegetable medicines just one month now, and the result seems almost miraculous. My trouble is all cured and I feel a different man entirely. As I haven't felt better in years. Anyone reading this can realize how grateful I am to Doctor Shores.

MR. JOS. N. HICKS, 43 EAST NINTH SOUTH STREET, CITY.

Shores, and I shall be glad to tell anyone, in person, of the good he has done for me.

Mr. Fred McDonald, of Alpine, Utah County, Utah, says:

"I had catarrh of the head, throat and ears for four years. It so affected my hearing until I could scarcely hear at all. I had to tell to make me hear. Now, after a short time under Doctor G. W. Shores' care and treatment, I can hear as well as anyone. What he has done for me is simply remarkable. I am more than satisfied and glad to recommend him to other sufferers."

"Then was when a kind Providence first directed me to Doctor Shores. I had heard of him from some of the other doctors who had given me up to die and my friends believed there was no hope for my ever recovering. I can't find words to tell all Doctor Shores has done for me and the gratitude I feel toward him. In every way he seemed everything that was different from all the other doctors I had tried. He was kind, sympathetic and serious in his efforts to help me. Why I received more benefit from his treatment in the first few days—for I improved from the first—than from all the others together, I shall never find out. I am now able to do my work and feel like a new man."

Her mother, Mrs. Elizabeth Parry, says:

"I have been under Doctor Shores' treatment for some time. My daughter had catarrh of the head, throat and ears for some time. She was almost deaf and could not hear. Now she can hear as well as anyone. What he has done for me is simply remarkable. I am more than satisfied and glad to recommend him to other sufferers."

"After Other Doctors Gave Me Up to Die"—"After Friends and Relatives Believed There Was No Possible Hope of Recovery"—Are the Common Expressions of Patients Cured by Doctor Shores.

Mrs. Harriett E. Parry, residing with her mother at 154 North Seventh West street, has lived in Utah for over 25 years. In a recent interview with the writer, she said:

"I suffered from catarrh poison in my system for years; I believe worse than anybody ever did. I had such fearful pains through my head, and dizziness that almost crazed me. At times I would be entirely blind. My stomach was in a terrible condition; suffered awful distress and pain and had regular vomiting spells that would almost kill me.

"My heart, also, was affected. Spells of palpitation would come on and I would be unable to rest. I was almost paralyzed. Oh, it is impossible to describe all the horror I passed through. I became reduced in flesh to a mere skeleton.

"For several weeks at one time I was prostrated and could not move from my bed, and was unable to eat a mouthful of my food. And, mind you, I was doctoring all the time; was under physicians' care nearly every day, with the best doctors here and east, until finally they said they could not help me, and gave me up to die.

"Then was when a kind Providence first directed me to Doctor Shores. I had heard of him from some of the other doctors who had given me up to die and my friends believed there was no hope for my ever recovering. I can't find words to tell all Doctor Shores has done for me and the gratitude I feel toward him. In every way he seemed everything that was different from all the other doctors I had tried. He was kind, sympathetic and serious in his efforts to help me. Why I received more benefit from his treatment in the first few days—for I improved from the first—than from all the others together, I shall never find out. I am now able to do my work and feel like a new man."

MRS. HARRIETT E. PARRY, 154 NORTH SEVENTH WEST STREET.

strengthening, purifying vegetable medicines have made a new being of me. My suffering is all gone. I eat three hearty meals a day now, and enjoy every one of them.

"I am glad to make this statement, and I sincerely hope that everyone suffering with catarrh who reads this will take warning from my experience and not neglect their own risk of injury by foolishly using some incompetent doctor, but go at once to this splendid physician—Doctor Shores—and be cured."

HORRIBLE RESULTS

Of Neglected or Wrongfully Treated Catarrh. The New Treatment of Dr. Shores Tried and Proven by Thousands to Absolutely Master This Dread Disease in all its Miserable and Unsightly Complications—A Case in Point.

Mr. Hendley is well- and favorably known, and has a large circle of friends and acquaintances. In his recent interview with the writer, he said:

"I had catarrh poison in my system for fifteen years, and I can say from experience that when it is allowed to go on unchecked the result is simply horrible.

"Besides ordinary symptoms, my trouble had gone so far my mouth and stomach were eaten away in patches and holes, and I suffered fearful pain and agony at all times. I had no appetite, food could not digest, my stomach was so sore and poisoned.

"I doctored most all the time for seven years, and under the treatment of five of the best doctors in the east, but none could give me any permanent relief. The disease kept getting worse and worse until I was induced to go to Doctor Shores. His soothing treatment and

STOOD THE TEST OF TIME.

A Specimen Case of Permanent Cures Made by Dr. Shores' Famous Treatment.

Does Doctor Shores cure his patients? Thousands of people answer an emphatic yes—

Are Doctor Shores' cures permanent? Do his patients when cured stay cured? Read what Mrs. Solis says below—then go and see her at her address given and talk with her and be convinced.

Mrs. Ellen Solis, residence No. 2, Cottage Court, Fourth East, between Sixth and Seventh South, called on Doctor G. W. Shores one day last week and said: "Doctor, I want to send my son to you to be treated. I know you can cure him, for your treatment cured my little girl a year ago and she has never been sick since."

Further Mrs. Solis stated to the writer: "I have good reason for my faith in Doctor Shores' Wonderful Treatment. I know from experience and personal observation that it not only cures, but permanently cures."

"My little daughter Mary suffered with St. Vitus' dance in the worst form. I believed she would die. I couldn't hope for her recovery. Friends told me that if she was ever cured it certainly would take three years or more."

"I placed her under Doctor Shores' treatment and she was cured in three months. That was a year ago and she has never had the slightest return of the trouble. I know this sounds remarkable, but if anyone reading it feels doubtful or skeptical, I should be glad to have them call on me and see my little daughter. I can't do or say enough in praise of Doctor Shores."

SOUTHERN UTAH COTTON.

Very Superior Batting Now Being Manufactured.

BRADSTREET'S LAST REPORT

BUSINESS IMPROVING, BUT INCREASE NOT SO GREAT.

Jobbers Settling on Closer Terms and Shorter Time—Decrease in the Number of Failures and Amount Involved—Continued Good Weather Working Great Trade—But Little New Eastern Money Coming—Telephone Switchboard Delivered to R. Jones Will Remove.

Zion's Cooperative Mercantile Institution has just received a 1,000 pound shipment of cotton batting from the Washington mills near St. George, and others are to follow as rapidly as the trade demands. The Co-op has for several years—in fact, since the mills began the manufacture of the batting—taken the entire product of the Washington institution and this is making quite an industry in the south. Being able to place its cotton when prepared in the shape of batting, on the Salt Lake market, the mills have reached out and the demand for more cotton is bound to increase. The production of the fibre in Dixie. This increase was very noticeable this year and will be even more marked in 1895, for the people have taken hold of the matter in earnest and propose to make the cotton belt do its best. This year's production of batting is estimated at 12,000 pounds.

Those people that have used the southern cotton batting it is greatly superior to the imported and they will have no other. In prices the Washington mills, with the aid of the Co-op are meeting all competition, although they are turning out the genuine cotton batting. All eastern mills convert their waste into the article of commerce, but not so with the Dixie institution, which makes use of only the softest and cleanest cotton. In addition to the manufacture of the batting these mills are turning out very superior sheeting and many other classes of cotton goods together with woolen and mixed cloths. All find ready sale in the southern part of the territory.

The general public may not be aware of the fact, but the Overland mills at Denver have invaded this market and shut out the eastern manufacturers on all sheetings and other cotton goods. Of course, the eastern producers at they do not now have the same ready sale as before the Colorado mills entered Utah in search of trade. The sheeting turned out by the Overland has no superior in the market in either price or quality. Utah merchants will always patronize the institutions of neighboring states before they send to the east.

BRADSTREET'S NOVEMBER REPORT

Sell an Encouraging Increase in General Business.

Bradstreet's report of trade and finance for the month of November was issued yesterday. Its contents are encouraging, and a copy is as follows:

We have now arrived at a time where a comparison of the business of the current period of this year with that of last does not reflect upon the latter as unfavorably, or give rise to the thought that it has assumed other than very ordinary proportions. Since the month of June every comparison made has been against the year 1893, although one feature that equalizes such great depression that although much less than in the corresponding period of 1892 a marked increase over last year could easily be shown. Towards the latter part of 1893 there was a tendency to partial revival, or rather settlement of conditions and comparisons from this on will probably not indicate such a heavy increase as in the preceding months of the latter half of the year.

During November trade has sustained itself to correspond in a measure with the increase experienced in the five preceding months. The volume of the city's jobbing business is estimated to range from 15 to 20 per cent over November, 1893, although one feature that equalizes the increase is a tendency on the part of jobbers to sell on closer terms and shorter time—profits are thus reduced to a point formerly reached with a less volume of business, but a saving is effected in the amount of capital necessary to handle the business and a decrease in credit is the result. County collections have not been as good during the month as was anticipated, although it is expected that during December a more notable improvement will come, as produce shipments have been made freely of late.

Trade in groceries has been accelerated by continued favorable weather, as well as by the fact that points have bought early in order to take advantage of the opportunity for easy handling. In the city comparative easiness is to be noted in financial circles—there are fewer tax delinquencies than at the close of November, 1893, while earnings show an increase of about 40 per cent for the month.

Failures, with comparisons with the corresponding month of last year and preceding month, are as follows:

	No. Assets, Liab.
November, '94	11,116,620 \$18,588
November, '93	11,123,292 \$26,552
October, '94	10,136,167 \$29,194

HAROLD M. PERRY, Superintendent.

WORKING GREAT DAMAGE.

Continued Good Weather Not Conducive of Prosperity.

While this continued fine weather may be greatly appreciated by the general public there are many material interests which will suffer if the present dry state continues for very many days longer. The sheep and cattle owners are praying for snow enough to enable them to get their flocks and herds out on to the winter ranges. Unless the sheep are moved on the desert within the next week they will commence to die of starvation and thirst. In many instances it is now necessary to drive over a day away from the water in order to get any feed, and even then the fodder is very scarce. A move on to the desert is the only salvation of the flocks. Of course the cattle are not in such a bad shape, but the loss to that industry will be considerable if the snow does not come in the near future.

The backwardness of winter is keeping down the orders received by the woolen mills, and in consequence both the Provo and the Deseret mills have accumulated a great stock of heavy goods. Trade is bound to increase, however, and the institutions should have no difficulty in disposing of their holdings. The Provo mills are operating to their fullest capacity, but the Deseret have less than one-half of the machinery in operation on account of the recent accident to one of the boilers. It will require in the

neighborhood of six weeks yet to make the necessary repairs, and until that time the mills will not be operated in full.

NO FLOOD OF MONEY CAME.

Eastern Capital Plentiful, But Still Extremely Cautious.

With the passage of the election fever it was anticipated that a great flood of eastern money would, figuratively speaking, inundate this city and territory and cause the rate of interest to drop even below its present quotations. But such has not been the case. Eastern money is just as hard to negotiate as ever. Of course, there is plenty of outside money held in this city for investment, but the owners are so extremely cautious that they will not loosen up unless the property offered as security has first been examined by several experts and pronounced first-class, gilt-edged, in fact, close in and improved. The rates of interest remain about the same, ranging from 6 per cent to 10 per cent.

During the past week some extensive loan negotiations have been on, but with the exception of placing a number of small blocks the local agents did not do much business in their regular line.

SWITCHBOARD ARRIVED.

With the Connections, It Required Two Box Cars.

Two box cars containing the new switchboard for the Rocky Mountain Bell Telephone company and all connections reached this city yesterday and were unloaded during the afternoon. Experts are now on their way from the factory to Salt Lake, and upon their arrival here the board is to be placed in the new exchange building on State street, which is practically completed and one of the handsomest structures in the city.

This switchboard is a duplicate of that exhibited at the World's fair, and is valued at \$300,000. Its first cost was very heavy. The company has now placed four of the six overhead cables along First South and is strung in strings the fifth, which will reach from the intersection of State and First South West to West Temple street. As soon as this work is completed, the undergrounding of the approaches is to commence, so that by the time the board is placed everything will be in readiness for the connections. All of the wires in the system will be the conduit at the intersection of State and First South streets, the greater majority of them being carried along First South.

The Union assay office will remove shortly after 10 o'clock to the offices now occupied by Selectman Bamberger on the west side of West Temple street, between First and Second South.

Base Discrimination.

We notice in the columns of a morning paper that a public official of Salt Lake county is using the power of his high office to advertise certain real estate interests of Salt Lake, under the name and style of "Delinquent taxes." A careful examination of these advertisements has resulted in a failure to find therein the name of proportion place. It is that the heel of power is always grinding on the neck of the weak. Anyway, we don't care. It's a pretty good advertisement for us not to have him mention us at all; and it is a good lesson to him, he can leave it out right along.

Notice to Water Rate Payers.

The Board of Equalization appointed to hear grievances from water-rate payers as to alleged excessive or wrongful assessments will sit in the council chamber, West Temple street, December 5, 1894, at 7:30 p. m., and continue in session each evening until further notice. By order of the City Council.

H. T. DICK, City Treasurer.

Dr. Sheldermine improves the vision by glasses peculiarly fitted.

ried along to that point by means of the cables.

Now Waiting For Pipe.

The projectors of the natural gas enterprise have decided to begin excavating for the pipe line trench should wait until the pipe is upon the ground. It is anticipated that the first delivery will be made within the next ten days, and by that time everything will be in proper shape for the commencement of actual operations. The gentlemen who are backing the project realize that the work must be thorough and that the project must be carried out in a businesslike manner. The projectors are now waiting for the pipe to be delivered to the site.

The Elks.

The first Sunday of the month of December is set apart by the Order of Elks as their annual memorial day, on which a sacred service is held in the memory of the departed members of that lodge. Therefore the Salt Lake Lodge of Elks will hold a session in the Old Fellows' hall this afternoon, at 2 o'clock, to which the public are invited. An excellent program of songs, recitations and music will be given, and the program will be given in which the Elks will participate.

Hackers in Dock.

Jack Hays and "Hoodoo Bill," the hack driver, were arrested about 3 o'clock this morning for scrapping on the White House corner.

T. R. Jones & Co. Will Move.

With the coming of the new year some important changes will be made in the location of a number of the city's most prominent institutions. Among them will be the banking house of T. R. Jones & Co. and Germania Smelting company. These companies will, after the first of the year, occupy the old McCormick bank building, on the west side of Main between First and Second South.

Base Discrimination.
